

Math worksheet on 'Fractions - Equivalent - 1 digit (Level 1)'. Part of a broader unit on 'Fractions - Intro'

Learn online: [app.mobius.academy/math/units/fractions\\_intro/](http://app.mobius.academy/math/units/fractions_intro/)

**1** Complete the equivalent fraction by finding the missing denominator

<b>a</b>	<b>b</b>	<b>c</b>
7	0	200
<b>d</b>	<b>e</b>	<b>f</b>
8	4	2

$$\frac{1}{2} = \frac{2}{?}$$

**2** Complete the equivalent fraction by finding the missing numerator

<b>a</b>	<b>b</b>	<b>c</b>
2	10	100
<b>d</b>	<b>e</b>	<b>f</b>
0	3	1,000

$$\frac{1}{5} = \frac{?}{10}$$

**3** Complete the equivalent fraction by finding the missing numerator

<b>a</b>	<b>b</b>	<b>c</b>
1,200	4	2
<b>d</b>	<b>e</b>	<b>f</b>
12	1	3

$$\frac{1}{6} = \frac{?}{12}$$

**4** Complete the equivalent fraction by finding the missing denominator

<b>a</b>	<b>b</b>	<b>c</b>
13	300	12
<b>d</b>	<b>e</b>	<b>f</b>
0	7	3

$$\frac{1}{4} = \frac{3}{?}$$

**5** Complete the equivalent fraction by finding the missing numerator

<b>a</b>	<b>b</b>	<b>c</b>
1	6	900
<b>d</b>	<b>e</b>	<b>f</b>
3	0	-1

$$\frac{1}{3} = \frac{?}{9}$$

**6** Complete the equivalent fraction by finding the missing numerator

<b>a</b>	<b>b</b>	<b>c</b>
4	6	40
<b>d</b>	<b>e</b>	<b>f</b>
-10	2	0

$$\frac{1}{2} = \frac{?}{4}$$

**7** Complete the equivalent fraction by finding the missing denominator

<b>a</b>	<b>b</b>	<b>c</b>
9	60	3
<b>d</b>	<b>e</b>	<b>f</b>
10	6	4

$$\frac{1}{3} = \frac{3}{?}$$
