

Math worksheet on 'Circles - Rule to Find Radius from Diameter - Simple (Level 2)'. Part of a broader unit on 'Geometry - Circle Concepts - Intro'

Learn online: app.mobius.academy/math/units/geometry_circles_concept_intro/

2

If 'd' is the diameter, what is the radius 'r'?

a	r and d add to 90
b	r is half of d
c	Nothing, r and d are not
d	r and d add to 360
e	r and d add to 180
f	r is twice d

1

If 'd' is the diameter, what is the radius 'r'?

a	r is half of d
b	r is the same as d
c	Nothing, r and d are not
d	r and d add to 180
e	r is twice d
f	r and d add to 90

3

If 'd' is the diameter, what is the radius 'r'?

a	r and d add to 360
b	r is twice d
c	r is the same as d
d	Nothing, r and d are not
e	r and d add to 180
f	r is half of d

4

If 'd' is the diameter, what is the radius 'r'?

a	r is twice d
b	r and d add to 90
c	r and d add to 360
d	r is half of d
e	r and d add to 180
f	Nothing, r and d are not

5

If 'd' is the diameter, what is the radius 'r'?

a	r is the same as d
b	Nothing, r and d are not
c	r and d add to 90
d	r is half of d
e	r and d add to 180
f	r is twice d

6

If 'd' is the diameter, what is the radius 'r'?

a	r and d add to 360
b	r is half of d
c	r is the same as d
d	Nothing, r and d are not
e	r and d add to 180
f	r and d add to 90

7

If 'd' is the diameter, what is the radius 'r'?

a	Nothing, r and d are not
b	r is half of d
c	r and d add to 90
d	r and d add to 360
e	r is the same as d
f	r is twice d
