1 Find the x intercept of this function by setting y to zero and solving

$$-36x + 6y = 108$$

a	b	c	d	e	f
-7	-13	-1	-3	-11	-12

2 Find the x intercept of this function by setting y to zero and solving

$$-30x + 5y = 60$$

a	b	c	d	e	f
-1	4	-7	-6	2	-2

3 Find the x intercept of this function by setting y to zero and solving

$$25x + 5y = -25$$

a	b	c	d	e	f
4	-1	3	5	-3	2

4 Find the x intercept of this function by setting y to zero and solving

$$-24x + 4y = 48$$

a	b	c	d	e	f
5	-2	7	-12	-7	-6

5 Find the x intercept of this function by setting y to zero and solving

$$-25x + 5y = 25$$

a	b	c	d	e	f
8	-1	-2	-5	-9	-11

6 Find the x intercept of this function by setting y to zero and solving

$$-2x - 2y = 6$$

a	b	c	d	e	f
2	-6	-12	-3	-13	-9

7 Find the x intercept of this function by setting y to zero and solving

$$-21x + 3y = 21$$

a	b	c	d	e	f
6	4	8	-1	5	-2
