

Math worksheet on 'Order of Operations Example - Add, Subtract with Exponents (Level 1)'. Part of a broader unit on 'Order of Operations - Practice'

Learn online: app.mobius.academy/math/units/order_of_operations_practice/

1 Which operation should be done first in this equation?

$$9 + 2^2 - 4 = ?$$

a $2 - 4$

b $9 + 2$

c 2^2

2 Which operation should be done first in this equation?

$$6 - 2 + 4^2 = ?$$

a 4^2

b $6 - 2$

c $2 + 4$

3 Which operation should be done first in this equation?

$$9 + 7^2 - 5 = ?$$

a $7 - 5$

b 7^2

c $9 + 7$

4 Which operation should be done first in this equation?

$$9 - 7 + 2^2 = ?$$

a $9 - 7$

b $7 + 2$

c 2^2

5 Which operation should be done first in this equation?

$$5 + 3^2 - 7 = ?$$

a 3^2

b $5 + 3$

c $3 - 7$

6 Which operation should be done first in this equation?

$$7 + 2^2 - 4 = ?$$

a 2^2

b $2 - 4$

c $7 + 2$

7 Which operation should be done first in this equation?

$$4 + 7^2 - 5 = ?$$

a 7^2

b $4 + 7$

c $7 - 5$
