

Math worksheet on 'Order of Operations Example - Add, Subtract with Parentheses (Level 1)'. Part of a broader unit on 'Order of Operations - Practice'

Learn online: [app.mobius.academy/math/units/order\\_of\\_operations\\_practice/](http://app.mobius.academy/math/units/order_of_operations_practice/)

1

Which operation should be done first in this equation?

$$(3 + 2) - 7 = ?$$

a

$$3 + 2$$

b

$$2 - 7$$

2

Which operation should be done first in this equation?

$$(8 - 7) + 2 = ?$$

a

$$8 - 7$$

b

$$7 + 2$$

3

Which operation should be done first in this equation?

$$9 + (3 - 6) = ?$$

a

$$3 - 6$$

b

$$9 + 3$$

4

Which operation should be done first in this equation?

$$(9 + 7) - 5 = ?$$

a

$$7 - 5$$

b

$$9 + 7$$

5

Which operation should be done first in this equation?

$$8 + (4 - 7) = ?$$

a

$$8 + 4$$

b

$$4 - 7$$

6

Which operation should be done first in this equation?

$$(8 - 5) + 4 = ?$$

a

$$8 - 5$$

b

$$5 + 4$$

7

Which operation should be done first in this equation?

$$(4 + 3) - 6 = ?$$

a

$$4 + 3$$

b

$$3 - 6$$
