Order of Operations Introduction -Subtract vs Multiply

Given that multiplication should be done before subtraction, which operation should be done first in this equation?

$$6 \times 2 - 3 = ?_{A}$$

 $2 - 36 \times 2$

2

 $8 - 6 \times 5 = ?$

Given that multiplication should be done before subtraction, which operation should be done first in this equation?

$$6 \times 58 - 6$$

3

Given that multiplication should be done before should be done first in this

$$9 \times 5 - 7 = ?_{\bar{A}}$$

subtraction, which operation equation?

$$9\times55-7$$

4

 $9 \times 6 - 5 = ?_{A}$

Given that multiplication should be done before subtraction, which operation should be done first in this equation?

$$9\times66-5$$

5

Given that multiplication should be done before subtraction, which operation should be done first in this equation?

$$4 - 3 \times 2 = ?_{A}$$

 $3 \times 2 | 4 - 3 |$

 $4 \times 6 - 5 = ?$

Given that multiplication should be done before subtraction, which operation should be done first in this equation?

$$6-5$$
 4×6

7

Given that multiplication should be done before subtraction, which operation should be done first in this

$$8 - 4 \times 6 = ?_{A}$$

 $4 \times 68 - 4$

8

 $8 \times 2 - 6 = ?_{A}$

Given that multiplication should be done before subtraction, which operation should be done first in this

$$2-68\times 2$$
