

Math worksheet on 'Order of Operations Priority - Add, Subtract with Exponents (Level 1)'. Part of a broader unit on 'Order of Operations - Practice'

Learn online: [app.mobius.academy/math/units/order\\_of\\_operations\\_practice/](http://app.mobius.academy/math/units/order_of_operations_practice/)

**2** What do the rules for Order of Operations tell us about how to solve this equation?  $8 + 5^2 - 7 = ?$

- |  |   |
|--|---|
| <b>a</b> Subtraction is highest priority | <b>b</b> All operations are the same priority, calculate left to right. |
| <b>c</b> Addition is highest priority    | <b>d</b> The exponent is highest priority                               |

**4** What do the rules for Order of Operations tell us about how to solve this equation?  $9 - 5 + 4^2 = ?$

- |   |   |
|---|---|
| <b>a</b> The exponent is highest priority | <b>b</b> All operations are the same priority, calculate left to right. |
| <b>c</b> Addition is highest priority     | <b>d</b> Subtraction is highest priority                                |

**6** What do the rules for Order of Operations tell us about how to solve this equation?  $9 - 6 + 2^2 = ?$

- |   |   |
|---|---|
| <b>a</b> All operations are the same priority, calculate left to right. | <b>b</b> Subtraction is highest priority  |
| <b>c</b> Addition is highest priority                                   | <b>d</b> The exponent is highest priority |

**1** What do the rules for Order of Operations tell us about how to solve this equation?  $9 - 3 + 2^2 = ?$

- |   |   |
|---|---|
| <b>a</b> Subtraction is highest priority  | <b>b</b> All operations are the same priority, calculate left to right. |
| <b>c</b> The exponent is highest priority | <b>d</b> Addition is highest priority                                   |

**3** What do the rules for Order of Operations tell us about how to solve this equation?  $8 - 3 + 5^2 = ?$

- |  |   |
|--|---|
| <b>a</b> Addition is highest priority    | <b>b</b> All operations are the same priority, calculate left to right. |
| <b>c</b> Subtraction is highest priority | <b>d</b> The exponent is highest priority                               |

**5** What do the rules for Order of Operations tell us about how to solve this equation?  $8 + 2^2 - 5 = ?$

- |   |   |
|---|---|
| <b>a</b> Subtraction is highest priority                                | <b>b</b> Addition is highest priority     |
| <b>c</b> All operations are the same priority, calculate left to right. | <b>d</b> The exponent is highest priority |

**7** What do the rules for Order of Operations tell us about how to solve this equation?  $9 - 7 + 4^2 = ?$

- |   |   |
|---|---|
| <b>a</b> Addition is highest priority     | <b>b</b> All operations are the same priority, calculate left to right. |
| <b>c</b> The exponent is highest priority | <b>d</b> Subtraction is highest priority                                |
