mobius

Math worksheet on *'Order of Operations Priority - All Basic Operators with Parentheses (Level 1)'*. Part of a broader unit on *'Order of Operations - Practice'*

Learn online: app.mobius.academy/math/units/order_of_operations_practice/

1

What do the rules for Order of Operations tell us about how to solve this equation?

$$9 \div (5 + 7) = ?$$

a	All operations are the same priority, calculate left to right.	**b**	Division is highest priority
c	Brackets are highest priority, calculate inside them first.	**d**	Addition is highest priority

2

What do the rules for Order of Operations tell us about how to solve this equation?

$$(9 \div 3) \times 7 = ?$$

a	Multiplication is highest priority	**b**	Division is highest priority
c	All operations are the same priority, calculate left to right.	**d**	Brackets are highest priority, calculate inside them first.

3

What do the rules for Order of Operations tell us about how to solve this equation?

$$3 \div (4 + 5) = ?$$

a	Brackets are highest priority, calculate inside them first.	**b**	Division is highest priority
c	Addition is highest priority	**d**	All operations are the same priority, calculate left to right.

4

What do the rules for Order of Operations tell us about how to solve this equation?

$$9 - (7 \times 6) = ?$$

a	Multiplication is highest priority	**b**	Brackets are highest priority, calculate inside them first.
c	All operations are the same priority, calculate left to right.	**d**	Subtraction is highest priority

5

What do the rules for Order of Operations tell us about how to solve this equation?

$$9 \div (7 - 5) = ?$$

a	All operations are the same priority, calculate left to right.	**b**	Brackets are highest priority, calculate inside them first.
c	Subtraction is highest priority	**d**	Division is highest priority

6

What do the rules for Order of Operations tell us about how to solve this equation?

$$(9 + 3) \times 5 = ?$$

a	Brackets are highest priority, calculate inside them first.	**b**	Addition is highest priority
c	All operations are the same priority, calculate left to right.	**d**	Multiplication is highest priority

7

What do the rules for Order of Operations tell us about how to solve this equation?

$$8 \div (4 + 3) = ?$$

a	Addition is highest priority	**b**	Brackets are highest priority, calculate inside them first.
c	All operations are the same priority, calculate left to right.	**d**	Division is highest priority
