

Math worksheet on 'Order of Operations Priority - Multiply, Divide with Exponents (Level 1)'. Part of a broader unit on 'Order of Operations - Practice'

Learn online: app.mobius.academy/math/units/order_of_operations_practice/

2
 What do the rules for Order of Operations tell us about how to solve this equation? $8 \div 4^3 \times 7 = ?$

a Division is highest priority	b Multiplication is highest priority
c All operations are the same priority, calculate left to right.	d The exponent is highest priority

1
 What do the rules for Order of Operations tell us about how to solve this equation? $7 \div 6^3 \times 2 = ?$

a The exponent is highest priority	b All operations are the same priority, calculate left to right.
c Division is highest priority	d Multiplication is highest priority

3
 What do the rules for Order of Operations tell us about how to solve this equation? $9 \div 3^3 \times 4 = ?$

a The exponent is highest priority	b Division is highest priority
c Multiplication is highest priority	d All operations are the same priority, calculate left to right.

4
 What do the rules for Order of Operations tell us about how to solve this equation? $3 \div 6^3 \times 4 = ?$

a All operations are the same priority, calculate left to right.	b Multiplication is highest priority
c The exponent is highest priority	d Division is highest priority

5
 What do the rules for Order of Operations tell us about how to solve this equation? $5 \div 2^3 \times 6 = ?$

a Multiplication is highest priority	b All operations are the same priority, calculate left to right.
c The exponent is highest priority	d Division is highest priority

6
 What do the rules for Order of Operations tell us about how to solve this equation? $7 \div 3^3 \times 6 = ?$

a All operations are the same priority, calculate left to right.	b The exponent is highest priority
c Division is highest priority	d Multiplication is highest priority

7
 What do the rules for Order of Operations tell us about how to solve this equation? $6 \div 3^3 \times 7 = ?$

a The exponent is highest priority	b All operations are the same priority, calculate left to right.
c Multiplication is highest priority	d Division is highest priority
