

Math worksheet on 'Order of Operations Priority - Multiply, Divide with Parentheses (Level 1)'. Part of a broader unit on 'Order of Operations - Practice'

Learn online: app.mobius.academy/math/units/order_of_operations_practice/

2

What do the rules for Order of Operations tell us about how to solve this equation? $8 \div (7 \times 5) = ?$

a Multiplication is highest priority	b Brackets are highest priority, calculate inside them first.
c All operations are the same priority, calculate left to right.	d Division is highest priority

1

What do the rules for Order of Operations tell us about how to solve this equation? $3 \div (6 \times 4) = ?$

a Brackets are highest priority, calculate inside them first.	b Multiplication is highest priority
c Division is highest priority	d All operations are the same priority, calculate left to right.

3

What do the rules for Order of Operations tell us about how to solve this equation? $6 \div (4 \times 7) = ?$

a Multiplication is highest priority	b Division is highest priority
c Brackets are highest priority, calculate inside them first.	d All operations are the same priority, calculate left to right.

4

What do the rules for Order of Operations tell us about how to solve this equation? $(9 \div 6) \times 7 = ?$

a All operations are the same priority, calculate left to right.	b Brackets are highest priority, calculate inside them first.
c Division is highest priority	d Multiplication is highest priority

5

What do the rules for Order of Operations tell us about how to solve this equation? $(8 \div 4) \times 5 = ?$

a Brackets are highest priority, calculate inside them first.	b Division is highest priority
c Multiplication is highest priority	d All operations are the same priority, calculate left to right.

6

What do the rules for Order of Operations tell us about how to solve this equation? $(9 \div 2) \times 3 = ?$

a All operations are the same priority, calculate left to right.	b Division is highest priority
c Brackets are highest priority, calculate inside them first.	d Multiplication is highest priority

7

What do the rules for Order of Operations tell us about how to solve this equation? $(8 \div 6) \times 4 = ?$

a All operations are the same priority, calculate left to right.	b Brackets are highest priority, calculate inside them first.
c Division is highest priority	d Multiplication is highest priority
