mobius

Math worksheet on *'Order of Operations Priority - Multiply, Divide with Parentheses (Level 1)'*. Part of a broader unit on *'Order of Operations - Practice'*

Learn online: app.mobius.academy/math/units/order_of_operations_practice/

1

What do the rules for Order of Operations tell us about how to solve this equation?

$$(8 \div 4) \times 5 = ?$$

a Division is highest priority	**b** All operations are the same priority, calculate left to right.
c Brackets are highest priority, calculate inside them first.	**d** Multiplication is highest priority

2

What do the rules for Order of Operations tell us about how to solve this equation?

$$9 \div (7 \times 5) = ?$$

a Multiplication is highest priority	**b** All operations are the same priority, calculate left to right.
c Division is highest priority	**d** Brackets are highest priority, calculate inside them first.

3

What do the rules for Order of Operations tell us about how to solve this equation?

$$8 \div (3 \times 2) = ?$$

a Division is highest priority	**b** All operations are the same priority, calculate left to right.
c Multiplication is highest priority	**d** Brackets are highest priority, calculate inside them first.

4

What do the rules for Order of Operations tell us about how to solve this equation?

$$8 \div (3 \times 5) = ?$$

a Multiplication is highest priority	**b** Division is highest priority
c All operations are the same priority, calculate left to right.	**d** Brackets are highest priority, calculate inside them first.

5

What do the rules for Order of Operations tell us about how to solve this equation?

$$3 \div (7 \times 6) = ?$$

a All operations are the same priority, calculate left to right.	**b** Division is highest priority
c Brackets are highest priority, calculate inside them first.	**d** Multiplication is highest priority

6

What do the rules for Order of Operations tell us about how to solve this equation?

$$(8 \div 6) \times 4 = ?$$

a Division is highest priority	**b** Brackets are highest priority, calculate inside them first.
c All operations are the same priority, calculate left to right.	**d** Multiplication is highest priority

7

What do the rules for Order of Operations tell us about how to solve this equation?

$$(8 \div 2) \times 4 = ?$$

a Division is highest priority	**b** Brackets are highest priority, calculate inside them first.
c Multiplication is highest priority	**d** All operations are the same priority, calculate left to right.
