

Perimeter of a Simple Shape Formula - Shape to Words

1 How would you calculate this shape's perimeter? 	A twice the length plus twice the width B four times the side length C side A + side B + side C	2 How would you calculate this shape's perimeter? 	A side A + side B + side C B twice the length plus twice the width C four times the side length
3 How would you calculate this shape's perimeter? 	A twice the length plus twice the width B four times the side length C side A + side B + side C	4 How would you calculate this shape's perimeter? 	A side A + side B + side C B twice the length plus twice the width C four times the side length
5 	How would you calculate this shape's perimeter? A side A + side B + side C B four times the side length	6 	How would you calculate this shape's perimeter? A side A + side B + side C B four times the side length
7 How would you calculate this shape's perimeter? 	A side A + side B + side C B twice the length plus twice the width C four times the side length	8 How would you calculate this shape's perimeter? 	A four times the side length B side A + side B + side C C twice the length plus twice the width
