

Math worksheet on 'Parts of a Circle - First Time (Level 1)'. Part of a broader unit on 'Geometry Basics - Practice'

Learn online: app.mobius.academy/math/units/geometry_basics_practice/

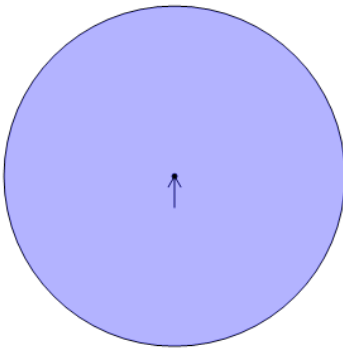

2

In geometry the position in the middle that is the same distance from all points on the edge is called what?

a	center
b	cantilevered

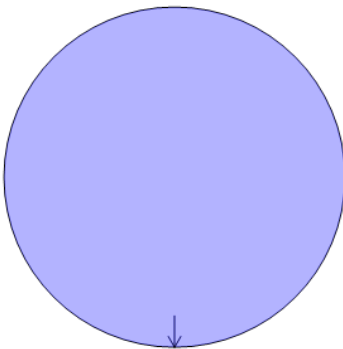

1

In geometry the position in the middle that is the same distance from all points on the edge is called what?

a	center
b	certain

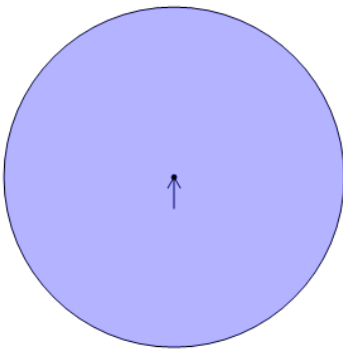

3

In geometry the outer edge of the circle is called what?

a	centrifugal
b	circumference

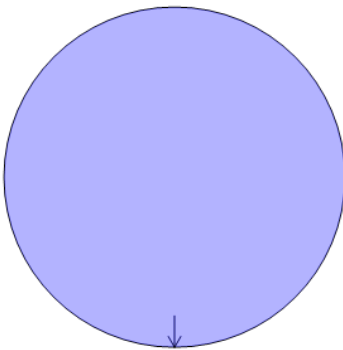

4

In geometry the position in the middle that is the same distance from all points on the edge is called what?

a	carrot
b	center

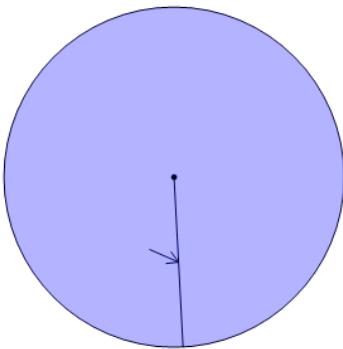

5

In geometry the outer edge of the circle is called what?

a	circumference
b	celestial

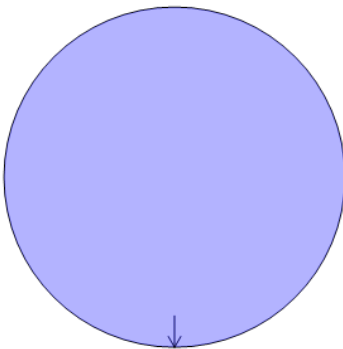

6

In geometry a line from the center to the edge is called what?

a	radius
b	rheumatoid

7

In geometry the outer edge of the circle is called what?

a	certain
b	circumference
