1

$$m = \frac{1}{4}$$

What line has a slope that is PERPENDICULAR to this slope?

2

What line has a slope that is PERPENDICULAR to this slope?

$$m = -2$$

3

What line has a slope that is PERPENDICULAR to this slope?

$$m = 5$$

4

What line has a slope that is PERPENDICULAR to this slope?

$$m = 3$$

5

What line has a slope that is PERPENDICULAR to this slope?

$$m = -\frac{1}{3}$$

6

What line has a slope that is PERPENDICULAR to this slope?

$$m = \frac{1}{3}$$

7

What line has a slope that is PERPENDICULAR to this slope?

$$m = -\frac{1}{2}$$
