

Math worksheet on 'Perfect Squares as Square of Number (Level 2)'. Part of a broader unit on 'Squares and Square Roots - Practice'

Learn online: app.mobius.academy/math/units/squares_and_square_roots_practice/

1 How can this perfect square be represented as a squared integer?

9

a	b	c
0^2	1^2	6^2
d	e	f
2^2	4^2	3^2

2 How can this perfect square be represented as a squared integer?

25

a	b	c
1^2	8^2	5^2
d	e	f
2^2	6^2	7^2

3 How can this perfect square be represented as a squared integer?

100

a	b	c
9^2	8^2	12^2
d	e	f
10^2	11^2	6^2

4 How can this perfect square be represented as a squared integer?

16

a	b	c
4^2	3^2	0^2
d	e	f
1^2	5^2	6^2

5 How can this perfect square be represented as a squared integer?

49

a	b	c
8^2	10^2	3^2
d	e	f
6^2	7^2	4^2

6 How can this perfect square be represented as a squared integer?

36

a	b	c
5^2	3^2	4^2
d	e	f
6^2	7^2	2^2

7 How can this perfect square be represented as a squared integer?

64

a	b	c
10^2	8^2	7^2
d	e	f
9^2	4^2	6^2
