

Math worksheet on 'Perfect Squares as Square of Number (Level 3)'. Part of a broader unit on 'Squares and Square Roots - Practice'

Learn online: app.mobius.academy/math/units/squares_and_square_roots_practice/

1 How can this perfect square be represented as a squared integer?

64

a	b	c
8^2	4^2	7^2
d	e	f
6^2	9^2	10^2

2 How can this perfect square be represented as a squared integer?

49

a	b	c
3^2	10^2	8^2
d	e	f
6^2	4^2	7^2

3 How can this perfect square be represented as a squared integer?

81

a	b	c
11^2	7^2	12^2
d	e	f
10^2	6^2	9^2

4 How can this perfect square be represented as a squared integer?

36

a	b	c
4^2	6^2	7^2
d	e	f
3^2	5^2	2^2

5 How can this perfect square be represented as a squared integer?

121

a	b	c
10^2	12^2	11^2
d	e	f
9^2	13^2	14^2

6 How can this perfect square be represented as a squared integer?

100

a	b	c
12^2	8^2	10^2
d	e	f
6^2	11^2	9^2

7 How can this perfect square be represented as a squared integer?

169

a	b	c
13^2	15^2	14^2
d	e	f
9^2	12^2	11^2
