

Math worksheet on '*Statistics - Mean/Median/Mode/Range - Approach to Name (Level 1)*'. Part of a broader unit on '*Probability and Statistics - Mean, Median, and Mode - Intro*'

Learn online:

[app.mobius.academy/math/units/probability\\_and\\_statistics\\_mean\\_median\\_mode\\_intr](http://app.mobius.academy/math/units/probability_and_statistics_mean_median_mode_intr)

1

Find the measurement that this approach would calculate

Add up all the numbers and divide by how many numbers there are

<b>a</b>	Mean	<b>b</b>	Range
<b>c</b>	Median	<b>d</b>	Mode

2

Find the measurement that this approach would calculate

Subtract the smallest number from the biggest number

<b>a</b>	Range	<b>b</b>	Mode
<b>c</b>	Mean	<b>d</b>	Median

3

Find the measurement that this approach would calculate

Count how many of each number there are and choose the one that is most common

<b>a</b>	Mode	<b>b</b>	Range
<b>c</b>	Mean	<b>d</b>	Median

4

Find the measurement that this approach would calculate

Put the numbers in order and choose the middle one

<b>a</b>	Mean	<b>b</b>	Range
<b>c</b>	Mode	<b>d</b>	Median
