[app.mobius.academy/math/units/probability\\_and\\_statistics\\_mean\\_median\\_mode\\_intr](http://app.mobius.academy/math/units/probability_and_statistics_mean_median_mode_intr)

**1** Find the approach that you would use to calculate this measurement

## Range

**a** Add up all the numbers and divide by how many numbers there are

**b** Count how many of each number there are and choose the one that is most common

**C** Put the numbers in order and choose the middle one

**d** Subtract the smallest number from the biggest number

**2** Find the approach that you would use to calculate this measurement

## Median

**a** Put the numbers in order and choose the middle one

**b** Add up all the numbers and divide by how many numbers there are

**C** Count how many of each number there are and choose the one that is most common

**d** Subtract the smallest number from the biggest number

**3** Find the approach that you would use to calculate this measurement

Mode

**a** Subtract the smallest number from the biggest number

**b** Put the numbers in order and choose the middle one

**C** Add up all the numbers and divide by how many numbers there are

**d** Count how many of each number there are and choose the one that is most common

**4** Find the approach that you would use to calculate this measurement

Mean

**a** Subtract the smallest number from the biggest number

**b** Count how many of each number there are and choose the one that is most common

**C** Put the numbers in order and choose the middle one

**d** Add up all the numbers and divide by how many numbers there are
