Transformations - Identify Type - First Time

| | | | | - | |
|----------|--|-----------------|-----|--|------------------|
| 1 A | In geometry, what's the name for the transformation that makes a mirror image of a shape? | | 2 | In geometry, what's the name for the transformation that moves a shape without spinning or turning it? | |
| | A Reflection | B Rheumatoid | A | A Thermal | B Translation |
| 3 A | In geometry, what's the name for the transformation that moves a shape without spinning or turning it? | | 4 | In geometry, what's the name for the transformation that makes a mirror image of a shape? | |
| В | A I | B Tabloid | A | A Reflection | B Rheumatoid |
| 5 | In geometry, what's the name for the transformation that spins a shape around a point? | | 6 A | In geometry, what's the name for the transformation that makes a mirror image of a shape? | |
| A | A Rotation | B Ramshackle | В | A Rostrum | B Reflection |
| 7 | In geometry, what's the name for the transformation that spins a shape around a point? | | 8 B | In geometry, what's the name for the transformation that makes a mirror image of a shape? | |
| В | A Rotation | B Revelry | A | A Revelry | B Reflection |
