1

In geometry, what is the name for a triangle with one angle more than 90° and all sides different lengths?

a

Opportunity Sextant

b

Obtuse Scalene

2

In geometry, what is the name for a triangle with one angle equal to 90° and all sides different lengths?

a

Ramshackle Shortened

b

Right Scalene

3

In geometry, what is the name for a triangle with all angles less than 90° and two sides the same length?

a

Acute Isosceles

b

Amethyst Infinite

4

In geometry, what is the name for a triangle with one angle more than 90° and two sides the same length?

a

Opportunity Infinite

b

Obtuse Isosceles

5

In geometry, what is the name for a triangle with all angles less than 90° and two sides the same length?

a

Asteroid Iodine

b

Acute Isosceles

6

In geometry, what is the name for a triangle with all angles less than 90° and two sides the same length?

a

Acute Isosceles

b

Amethyst Iodine

7

In geometry, what is the name for a triangle with all angles less than 90° and two sides the same length?

a

Ardvark Infinite

b

Acute Isosceles
