

Triangle Classification - Both - First Time

| 1 | In geometry, what is the name for a triangle with one angle equal to 90° and all sides different lengths? | 2 | In geometry, what is the name for a triangle with one angle more than 90° and all sides different lengths? |
|---|---|--|---|
| | A Right Scalene | | A Oblong Sandwich |
| | B Resting Staggered | | B Obtuse Scalene |
| 3 | In geometry, what is the name for a triangle with all angles less than 90° and two sides the same length? | 4 | In geometry, what is the name for a triangle with one angle more than 90° and all sides different lengths? |
| | A Acute Isosceles | * | A Obtuse Scalene |
| | B Alternative Idiomatic | A | B Octopus Staggered |
| 5 | In geometry, what is the name for a triangle with one angle more than 90° and all sides different lengths? | 6 | In geometry, what is the name for a triangle with one angle more than 90° and all sides different lengths? |
| | A Obtuse Scalene | * | A Obtuse Scalene |
| | B Oblong Sextant | | B Orangutan Sandwich |
| 7 | In geometry, what is the name for a triangle with one angle more than 90° and two sides the same length? | 8 | In geometry, what is the name for a triangle with one angle more than 90° and two sides the same length? |
| | A Obtuse Isosceles | The state of the s | A Opportunity Infinite |
| | B Omicron Intervene | 1 | B Obtuse Isosceles |
