app.mobius.academy/math/units/geometry_shapes_2d_classifying_advanced/

1

In geometry, what's the name for a triangle where two sides are the same length and one is different?

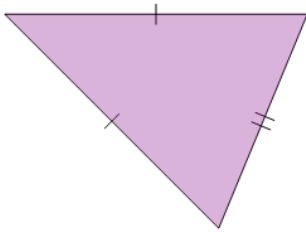

a

Immunity

b

Isosceles

2

In geometry, what's the name for a triangle where two sides are the same length and one is different?

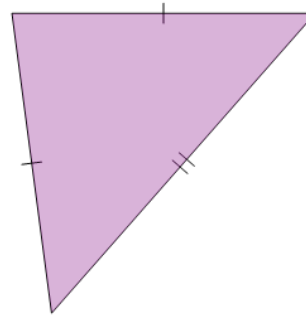

a

Isosceles

b

Intervene

3

In geometry, what's the name for a triangle where two sides are the same length and one is different?

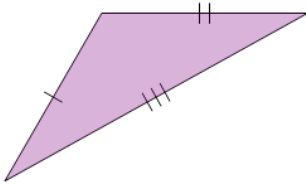

a

Isosceles

b

Immunity

4

In geometry, what's the name for a triangle where all sides are a different length?

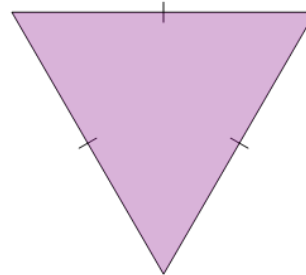

a

Scalene

b

Sandwich

5

In geometry, what's the name for a triangle where all sides are the same length?

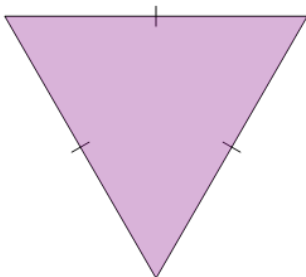

a

Emulated

b

Equilateral

6

In geometry, what's the name for a triangle where all sides are the same length?

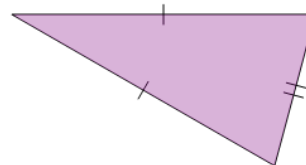

a

Excellent

b

Equilateral

7

In geometry, what's the name for a triangle where two sides are the same length and one is different?

a

Isosceles

b

Intervene
