1

In geometry, what's the name for a triangle where two sides are the same length and one is different?

<b>a</b>	<b>b</b>
Isosceles	Idiomatic

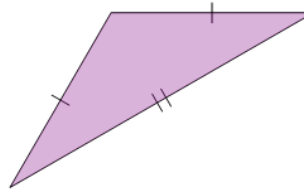

2

In geometry, what's the name for a triangle where two sides are the same length and one is different?

<b>a</b>	<b>b</b>
Isosceles	Intervene

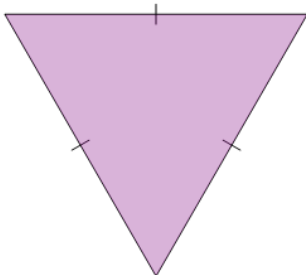

3

In geometry, what's the name for a triangle where two sides are the same length and one is different?

<b>a</b>	<b>b</b>
Isosceles	Intervene

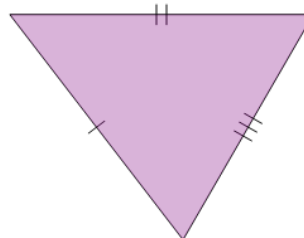

4

In geometry, what's the name for a triangle where all sides are the same length?

<b>a</b>	<b>b</b>
Excellent	Equilateral

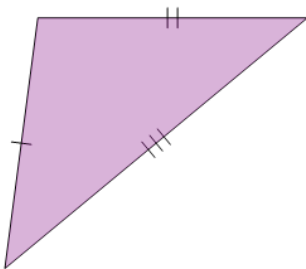

5

In geometry, what's the name for a triangle where all sides are a different length?

<b>a</b>	<b>b</b>
Scalene	Scalar

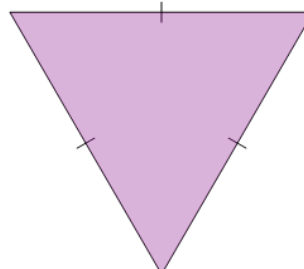

6

In geometry, what's the name for a triangle where all sides are a different length?

<b>a</b>	<b>b</b>
Scalene	Sextant

7

In geometry, what's the name for a triangle where all sides are the same length?

<b>a</b>	<b>b</b>
Equilateral	Emulated
