2 Choose the right description of the triangle based on its sides

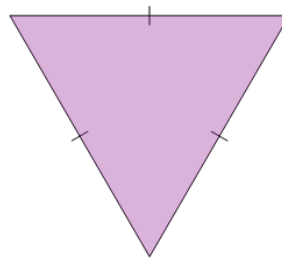

a Two sides are the same length and one is different

b All sides are the same length

c All sides are a different length

1 Choose the right description of the triangle based on its sides

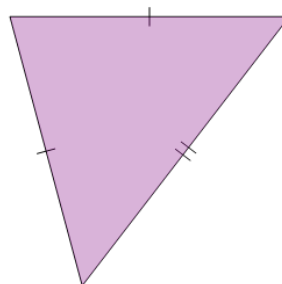

a Two sides are the same length and one is different

b All sides are the same length

c All sides are a different length

3 Choose the right description of the triangle based on its sides

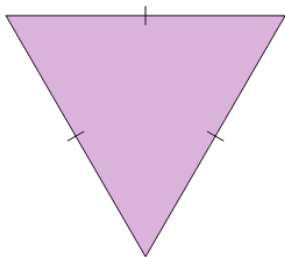

a All sides are the same length

b Two sides are the same length and one is different

c All sides are a different length

4 Choose the right description of the triangle based on its sides

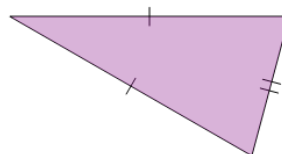

a All sides are the same length

b Two sides are the same length and one is different

c All sides are a different length

5 Choose the right description of the triangle based on its sides

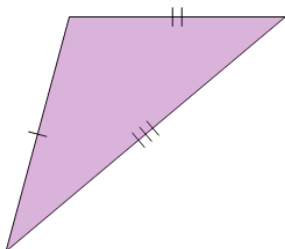

a All sides are the same length

b Two sides are the same length and one is different

c All sides are a different length

6 Choose the right description of the triangle based on its sides

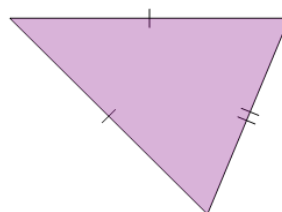

a All sides are the same length

b Two sides are the same length and one is different

c All sides are a different length

7 Choose the right description of the triangle based on its sides

a Two sides are the same length and one is different

b All sides are a different length

c All sides are the same length
